European Based Supplier of Quality Bags

Improving safety, minimizing logistic and process costs, sustaining and improving quality - TiszaTextil Group has the logistic solution to reach these targets.

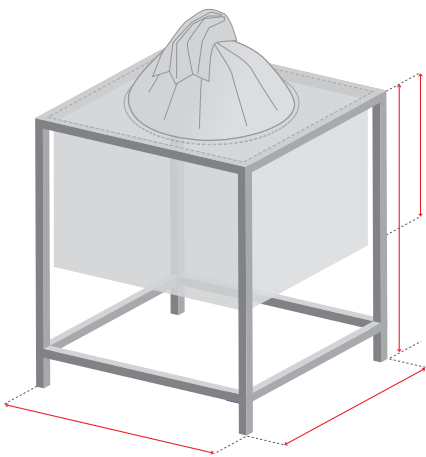

# successful customers with .

TiszaTextil is a renowned supplier of pharmaceutical logistic solutions which can replace cost-intensive investments in cleaning and transport systems.

Our extensive knowledge of the logistics required for pharmaceutical plants enables us

## minibag

The Minibag is designed to offer a safe and economic solution for the transport of solid, finished and semi-finished products. Produced in a state-of-the-art ISO8 cleanroom, the Minibag meets the demands of the European Pharmacopeia and USP for primary packaging.

to provide our customers with innovative and cost-cutting products.

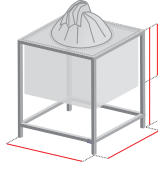

# pharmaceutical logistic syst

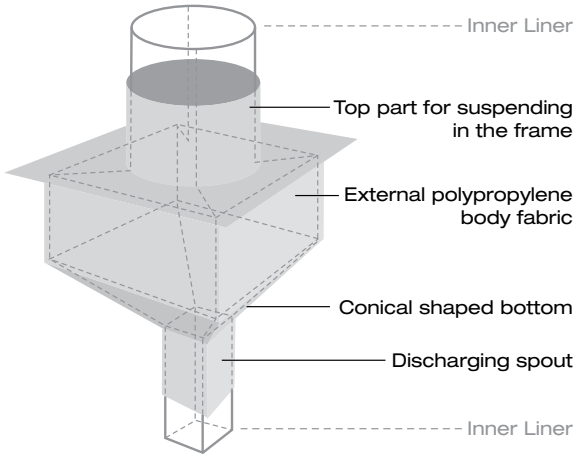

As a pollution-free flexible intermediate bulk container it can be used in the whole process of solid drug production.

Starting with the API and excipient handling

ISO 9000

ISO 14001

ISO 15378

and ending with feeding the final blistering line.

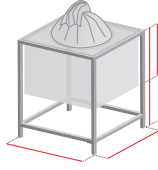

# ... by TiszaTextil

Whether you are designing a new production line or thinking about improving the existing one, we are able to design a logistic solution based on our Minibags and achieve astonishingly high ROI figures.

A customer with a worldwide setup replaced his existing logistic solution with the Minibag. *"Thanks to our expertise and close cooperation we managed to achieve astonishing savings in the whole production process: on average 60% savings on packaging material, logistic costs and quality inspection with the result that the investment was recouped in 2 months."*

Not only for shipping your goods, the Minibag

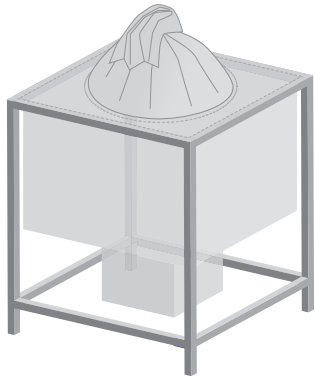

# minibag

Why our worldwide customers choose the Minibag:

- Low investment compared to metal containers
- Easy to fit into existing equipment and processes
- No cross-contamination risk
- Ergonomic handling

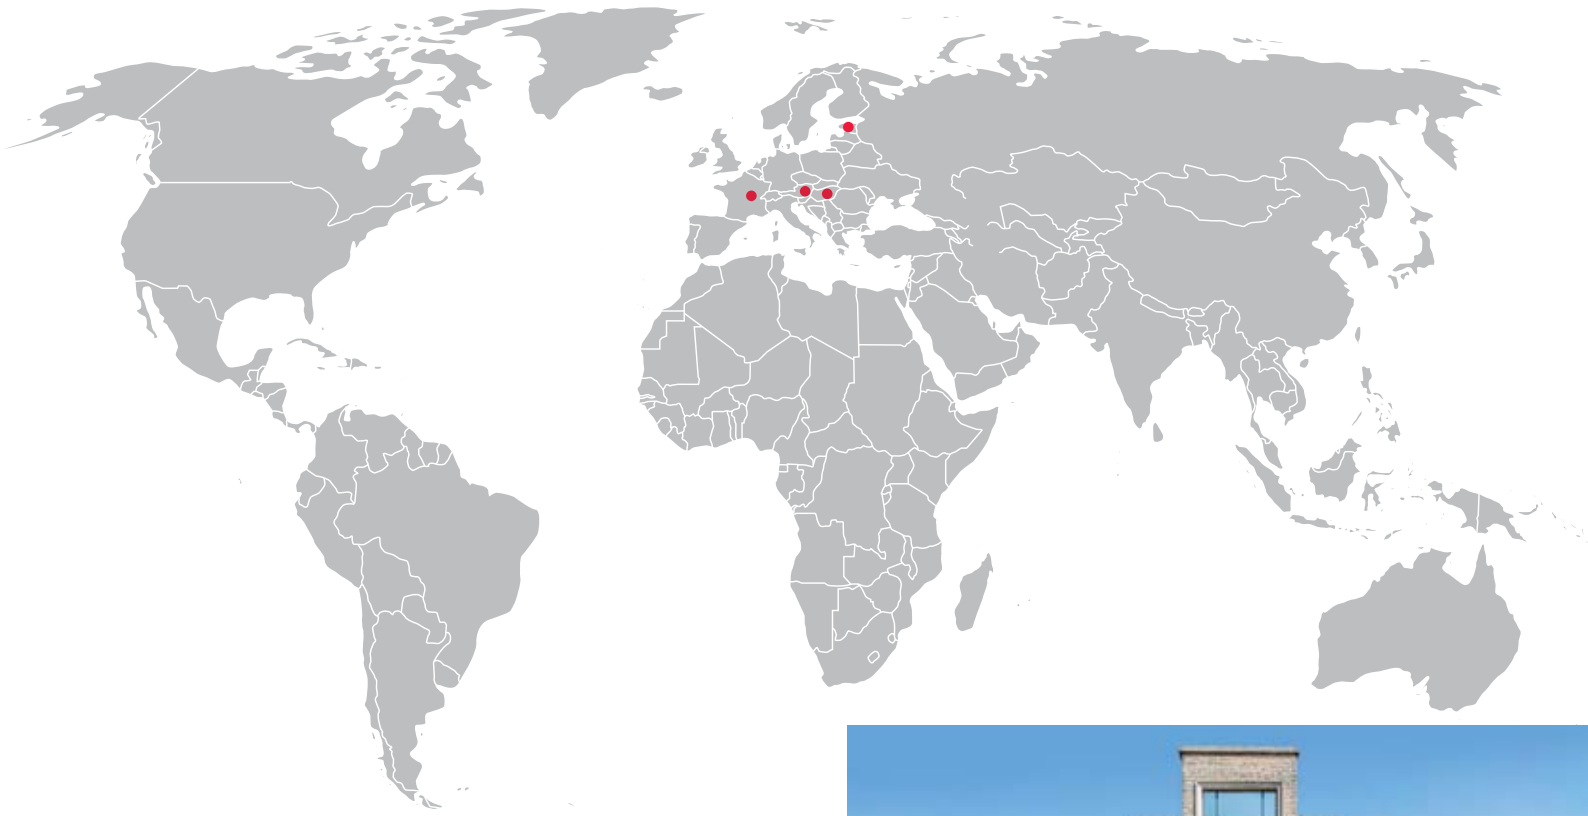

React quickly to increasing market demands. Add as many additional containers to the process as required with low investment and with no extra burden to the washing unit.
